DETAILED ACTION

Response to Election/Restrictions

1. Applicant's election of Group I, claims 1-2, in the reply filed on 10/04/07 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claim 3 is withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention(s), there being no allowable generic or linking claim. Election was made without traverse in the reply filed on 10/04/07.

Claim Objections

3. Claims 1-2 are objected to because of the following informalities:
 - A. In claim 1, line 1, "responsible" should be deleted.
 - B. In claim 2, line 1-2, "characterized in that" should be changed to "wherein--".
 - C. In claim 2, line 2, "responsible" should be deleted.

Appropriate correction is required.

Claim Rejections - 35 USC § 102(b)

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 1793

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Hagemeyer et al., "hereinafter referred to as Hagemeyer", (US Pat. 6,197,275 B1).

Hagemeyer discloses a catalyst composition having the formula: BaBi_yO_z , where y is from 0.17 to 2 and z is from 1.43 to 5.6, etc. (see col. 12, claim 5).

There is no patentable distinction seen between the claimed photocatalyst and that disclosed by the reference. Thus, the claims are anticipated by the teaching of the reference.

With respect to the intended use limitation on "is used for decomposing a harmful chemical substance" in claim 2, it is considered the claimed intended use does not make the claimed catalyst different in structure or the claimed photocatalyst depends on it for completeness. Thus, it has no bearing on the patentability of the claimed photocatalyst. See MPEP. 2111.02 and 2114. See also *In re Pearson*, 181 USPQ 641 & *In re Thrau*, 57 USPQ 324.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. All references are cited for related art. See PTO-892 Form prepared.

Conclusion

7. Claims 1-3 are pending. Claims 1-2 are rejected. Claim 3 is withdrawn due to nonelected (distinct) invention(s). No claims are allowed.
